The finished version of this concept will be hand-painted.

Final refinements and details will be made by hand, such as color correction, edge alignments, and brushwork that will make all the collaged, mocked up elements stylistically cohesive.

Artwork will be hand painted in artist's style
Artist is undecided if work will be hand painted on the box or installed on a vinyl wrap

This design is a playful representation of the flora and fauna that can be seen as one traverses the Nickel Plate Trail in Fishers, IN. Utilizing a bright color palette and forms based on paper arts (paper mache, collage, and origami) this design highlights creatures such as squirrels, foxes, rabbits, birds, and butterflies that families can identify along their journey. With an elementary school nearby, the theme needed to be fun and cheerful and appeal to users of all ages.
